

SIDDHANTH SADASHIV RAIKAR

DATA ANALYST

Newton School of Technology, Rishihood University | +91 8951332718 | siddhanth.raikar2024@nst.rishihood.edu.in

PROFILE SUMMARY

Full-Stack Developer and aspiring Data Analyst with hands-on experience in data cleaning, exploratory data analysis, KPI design, and dashboard development using Google Sheets. Skilled at transforming raw datasets into actionable insights through feature engineering, pivot analysis, and data visualization. Strong analytical mindset applied to real-world public safety datasets, with a focus on delivering data-driven recommendations. Also experienced in building production-grade web applications using Next.js, Node.js, and PostgreSQL.

PROFESSIONAL SKILLS

Professional Skills

Data Analysis & Interpretation
KPI Design & Business Metrics
Data Visualization & Storytelling
Feature Engineering & ETL

Technical Skills

Python | Pandas / NumPy | Scikit-learn
MS Excel / Google Sheets | GitHub | LangGraph
SQL | Streamlit | Next.js / Node.js

EDUCATION

B.Tech in Data Science 2024 – 2028

Newton School of Technology, Rishihood University, Sonipat, Haryana Grade: 7.64/10.0

PROJECTS

Flight Delay and Cancellation Analysis

Tech Stack: Python, Pandas, Tableau

- Cleaned and processed large flight datasets using Python (Pandas) for analysis
- Identified major delay factors including weather, carrier, and NAS delays
- Designed KPIs: average delay time, delay frequency, and on-time performance
- Built interactive dashboards in Tableau to track delay trends and patterns
- Delivered actionable insights to improve scheduling efficiency and reduce delays
- Performed trend analysis to identify peak delay periods and high-risk routes

Road Safety & Accident Analytics

Tech Stack: Google Sheets, Pivot Tables, KPI Design, Data Visualization, Feature Engineering

- Analyzed a 32-column road traffic accident dataset (19,067 casualties) to identify spatiotemporal risk factors and geographic hotspots
- Performed end-to-end ETL: standardized schema to snake_case, removed duplicates, applied TRIM(), corrected typos across 481+ rows, and imputed blanks with mode/Unknown logic
- Engineered derived features including time_category (Night/Morning/Afternoon/Evening), vehicle_condition_risk flag, gender encoding, and education-level binning
- Designed KPI framework: Total Casualty Volume (19,067), Injury Severity Breakdown (1.28% Fatal), Avg. Vehicle Involvement (2.04), Casualty-to-Vehicle Ratio (75.86%), Peak Severity Index (2.16)
- Built pivot-based EDA revealing a Night Severity Multiplier (index 2.16), Office Area hotspot clustering, and a driver complacency gap in 10+ year experienced drivers
- Developed an interactive Google Sheets dashboard with charts, heatmaps, and slicers for stakeholder-ready visual analytics

EXTRA-CURRICULAR ACTIVITIES

- Marketing & Outreach Team Member — Damru Fest:** Supported event promotion and campus-wide audience engagement
- Organizing Committee — Neutron 2.0 Tech Fest:** Contributed to end-to-end planning and execution of inter-college technology festival
